

1 securing clips further comprise at least two securing pins small enough and
2 long enough to fit through holes present on the computer chassis, into the
3 standardized screw holes present on the computer drive.

4 6. The screwless computer drive attachment means as in Claim 5 wherein the
5 securing clips further comprise flexible tabs designed to engage the clip
6 mounting features.

7 7. The screwless computer drive attachments means as in Claim 5 further
8 comprising a means for attaching the clip mounting features to the computer
9 chassis.

10 8. The screwless computer drive attachments means as in Claim 5 wherein the
11 clip mounting features are formed from and as a part of the computer
12 chassis.

13 9. A method of assembling a computer drive comprising the steps of:
14 1. Sliding a computer drive along rails into a drive mounting bracket;
15 2. Positioning securing clips comprising securing pins through pin
16 alignment holes present on the computer chassis; and,
17 3. Engaging flexible tabs present on the securing clips with clip mounting
18 features located on the computer chassis.

19 7. **Abstract of the Disclosure**

20 A screw less clip mounted computer drive.
